Forecast for Thursday 05 Jan 2023

Weather: Mainly dry with some clear intervals overnight. Clouding over during the morning with patchy light rain spreading from the southwest, this turning heavy and persistent for a time during the afternoon. The rain will clear to showers during the evening, turning wintry over the summits.

Chance of cloud-free hill tops above 800m: 40%, becoming 10% during the afternoon.

Low Cloud and visibility: Patchy or broken cloud bases around 400-600 metres, becoming more extensive as the rain arrives with bases lowering 300-500 metres, with moderate or poor visibilities. Clouds breaking during the evening, but reforming in the showers.

Met Office Aberdeen Meteorologist's View
Conditions deteriorating during the afternoon with heavy rain and continuing thaw of lying snow.

Forecast for Friday 06 Jan 2023

Weather: Occasional showers overnight, some heavy with hail and a risk of thunder and falling as snow over the summits, perhaps some clear intervals towards the Trossachs. The showers will become lighter and more isolated during the morning, with most ranges staying dry with some sunshine during the afternoon. Clouding over with some patchy mainly light rain and summit snow during the evening.

Maximum wind: West or SW 40 gust 70mph, easing 20 gust 30mph during the day, increasing SE 30 gust 50mph later.

Chance of cloud-free hill tops above 800m: 30 % becoming 80 % for a time during the afternoon

Low Cloud and visibility: Broken cloud bases 400-600 metres with moderate or poor visibilities in the showers, improving during the morning with summits largely cloud free for a time during the afternoon. Broken cloud forming with base 300-500 metres during the evening

Temperature: **Glens:** Plus 1 rising to plus 8 Celsius.
At 800m: Plus 1 lowering zero Celsius for a time.
Freezing level: 1200 m lowering 800-1000 metres for a time.
